See what people are doing with photos and videos

Millions of people around the world are using Adobe Photoshop Elements and Adobe Premiere Elements to explore their creativity and delight their friends and family. Check out some great examples in this showcase of customer work.

Jennifer Wright

Family photographer and videographer, Maryland

"I love using Adobe Photoshop Elements & Adobe Premiere Elements to create things like video Christmas cards that combine photos and video clips. It's really easy to tag my pictures and video clips, adjust the contrast in my photos in Photoshop Elements, and edit my video clips in Premiere Elements. "

Watch movie

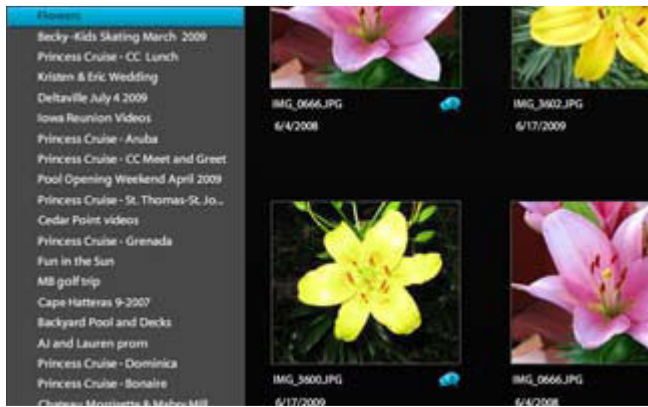

Kim Hammond

Digital scrapbooker, Connecticut

"When I started digital scrapbooking it was because I wanted to scrap with less mess, streamline my pages, and create pages from scratch just like I did with paper scrapping. Photoshop Elements gives me the most versatility to do all that and more."

View photo creation

Debbi Lucas

Photo enthusiast, Virginia

"I can touch up my photos, upload individual photos or albums, and then send a link so my friends and family can easily view the pictures online. And I don't have to worry about running out of space because Photoshop Elements Plus will give me all the storage I need as my collection grows."

Toni Gull

Family videographer, Utah

"Adobe Premiere Elements lets me create custom home movies and slide shows, complete with credits, and easily burn DVDs that wow my family and friends. I can combine audio, video, and photos, and even time transitions to the beat of the music. It's a great feeling when things all come together and people say, 'How did you do that?'"

[Watch movie](#)

Paula Pogolian

Digital scrapbooker, California

"I use Photoshop Elements for everything from fixing the color in my pictures with the levels adjustment to creating my own paper and digital scrapbook pages. I'm no longer upset when my pictures are bad because I know I can make them look better in Photoshop Elements."
