Super-sized Newsletter for Dec 10, 2013 "Codename: Lucky Fourteen"

1. Newsletter Editorial

Greetings and welcome to a super-sized edition of the DonationCoder.com newsletter, featuring some of the most interesting posts on the forum in the last three months, divided into fourteen bite-sized sections.

I do have a handful of topics I want to touch on briefly in this newsletter editorial.

Firstly, and most importantly, I want to encourage you to get involved in our NANY (New Apps for the New Year) 2014 event, where we encourage coders who are friends of the site to try to code and release something new. The deadline to submit something is January 1st, and the event is open to the public, young and old, amateur or pro. There are no winners or losers and everyone who participates gets a free coffee mug commemorating the event. Even if you're not a coder, stop by and cheer on the participants -- many of whom are first-time coders.

Secondly, we've finally gotten around to updating our new list of our favorite websites (see section 8 below). Hopefully you'll discover something new there and share with us your opinion about sites we should add to the list.

Thirdly, you'll see in sections 3 & 4 below that DC member Skwire and I have been in an unspoken competition to update our software applications -- resulting in a ton of updates in the last few months. So, if you're a user of one of our applications there's a good chance it's been updated recently.

And lastly, please consider making a small donation to help with the extra costs we incur at the end of each year in sending out our NANY event mugs.

And now on to the newsletter!
-jesse (mouser)
