View raw packet contents Auto show new packets

Manually Scan a URL: Download Open in Browser

1297 packets received (0 buffered locally).

I click on "Sniff Network", and I can see the packets fly by.

Automatic Network Adapter Detector

FAILED

ERROR: Failed to find a suitable network driver.

Don't panic!

There are many reasons that automatic adapter detection can fail.

The easiest fix is to switch to advanced mode and select your network adapter manually.

Autodetect Adapter Now

Cancel

But then this "FAILED" window pops up, and the view switches over to the "General Options" tab. When I go back to the "Search" tab, there are no results.
